Void

Category: Small tables / Consolle

Guglielmo Poletti, 2019

The Void collection was conceived as an exploration of form in relation to the architectural concepts of mass and void. Pure volumes and linear profiles define solids that are partially deconstructed and hollowed out, creating a design language that is at once unique, rigorous, and light. Each element of the collection is designed to offer a harmonious balance between material presence and visual perception, transforming metal into a tool of expression and lightness.
